SSLC
Nisha Matric School
68%

PROJECTS

Web Based Gym Management System

- A gym management system is a software application that helps gym owners or managers to efficiently manage their gym operations including member management, staff management, equipment management and reporting.
- Automating member sign-ups and information management, providing real-time gym usage data, automated billing, payment processing, and generating reports for gym owners or managers to make informed decisions.
- The solution would be to develop a Web Based Gym Management System that addresses these main points by providing a user-friendly interface for gym staff and members.
- The individual Trainer can add their profile in this application. The client can choose the Trainer of their choice, they can also select their preferable schedule.

CERTIFICATES

- I have completed a course called Diploma in computer application at the CSC Institute.
- I am certified in data visualization in power BI by NDLI club and Indian institute of technology.
- I have completed Java course complation certificate
